## Product Information Sheet

### **QHS-410**

Hydrogen Sulfide Scavenger

<b>Appearance:</b>	Light yellow liquid	<b>Density:</b>	8.2 lbs
<b>Odor:</b>	Alcohol	<b>Spec. Gravity:</b>	1.011
<b>Freezing point:</b>	Below -20F	<b>pH:</b>	7.5-9
<b>Flash point:</b>	110F	<b>Solubility:</b>	Water

Quick Pump Service, LLC. QHS-410 series products are a proprietary formulation designed to remove hydrogen sulfide from produced gas. These products will react with H<sub>2</sub>S to form water stable byproducts that may easily be removed from the system. The waste product may be disposed of at any salt water disposal.

These products may be injected directly into the flow line or loaded into a contact tower. Typical treatment rates .250 gallons per part per million of H<sub>2</sub>S per million cubic feet of gas treated. Dosages are directly related to the amount and quality of contact time. See your Quick Pump Service Sales professional for specific application information.

Avoid all bodily contact. In the event of eye contact flush with fresh water for 15 minutes and contact a physician. Skin contact, wash with soap and water. Use these products in well ventilated areas. For more information regarding the QHS-410 products refer to the SDS sheets.

For pricing and specific information regarding QHS-410, please contact your Quick Pump Service. Sales professional.

QHS-410 series are available in 55 gallon non-returnable drums or in bulk.
