Product Information Sheet

QSF-1150

Foaming Agent

Appearance:	Amber liquid	Density:	8.36 lbs
Odor:	Alcohol	Spec. Gravity:	1.02
Freezing point:	Below 0F	pH:	7.0-7.5
Flash point:	>100F	Solubility:	Water

Quick Pump Ser. QSF-1150 is a complex formulation of liquid anionic surface active foaming agents with Scale protection for use in deeper wells. This product is specifically designed to unload produced fluid from gas wells. QSF-1150 is formulated to perform in High oil and Low brine waters with chlorides up to 0 PPM to 80 PPM.

QSF-1150 is recommended for use in gas wells to unload produced water. It can be applied by batch treatment or by continuous injection. Contact your Quick Pump Ser. Sales professional for specific application.

Avoid contact with skin and clothing. If skin or eye contact does occur, flush exposed area with large amounts of water. Consult a Physician.

For pricing and specific information regarding QSF-1150, please contact your Quick Pump Ser. Sales professional.

QSF-1150 is available in 55 gallon non-returnable drums or in bulk.
